

Annual Management Report of Fund Performance

AGF Short-Term Income Class

September 30, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

As described in the Simplified Prospectus, the investment objective of AGF Short-Term Income Class (the "Fund") is to provide maximum income while preserving capital and liquidity. AGF Investments Inc. ("AGFI"), as portfolio manager, invests the Fund primarily in short-term instruments, government guaranteed securities, bankers acceptances and corporate paper with a minimum A credit rating. The Fund may also invest in foreign securities, which are typically not expected to exceed 49% of the Net Asset Value (see Explanatory Note (1) a)) of the Fund at the time of purchase.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The Fund continues to be suitable for investors investing for the short-term, seeking the income potential of short-term fixed income securities and who have low tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2023, the Mutual Fund Shares of the Fund returned 1.0% (net of expenses) while the Bloomberg Canadian Aggregate 1-5 Year Index returned 1.6%. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

On an expense-adjusted basis, the Fund out-performed the Bloomberg Canadian Aggregate 1-5 Year Index. In March 2023, the Fund's duration positioning versus the benchmark was adjusted lower following the strong rally in rates, resulting in a net benefit as yields continued to move higher over the second calendar quarter. Duration is a measure of the sensitivity of the portfolio to changes in interest rates. However, as rates kept increasing during the third calendar quarter, the Fund's duration positioning was adjusted higher, resulting in a net negative for the Fund. The Fund maintained an overweight to corporate credit versus the benchmark, which was a net positive over the reporting period.

The Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2023, the Fund was long Canadian dollar and short U.S. dollar in order to hedge its currency exposure.

The Fund had net redemptions of approximately \$5 million for the current period, as compared to net redemptions of approximately \$7 million in the prior period. The portfolio manager does not believe that redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period when compared to the previous period due to a decrease in average Net Asset Values. The decrease in custodian fees was due to changes in the rates charged by the custodian during the period. The decrease in independent review committee fees was due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Bond markets remained volatile over the reporting period, driven by variable economic data, geopolitical turmoil, the U.S. debt ceiling standoff, the banking system turmoil and central bank policies. Inflation levels broadly moderated but remained elevated versus target levels, and resilient economic activity also supported further central bank rate hikes, albeit at a more moderate pace. In recognition of the decelerating pace of inflation and the fact that monetary policy acts with a long and variable lag, the Bank of Canada ("BoC") elected to pause its rate hike campaign after raising rates in January 2023 by 0.25%. However, considering the surprisingly strong consumer sentiment and positive economic data, the BoC decided to restart its hiking cycle in June 2023 and raised rates by 0.25% at each of its meetings in June and July. The BoC kept rates unchanged at 5.0% at its September 2023 meeting, marking another pause in its tightening cycle in response to a slowdown in Canada's economy in the second calendar quarter of 2023. Unemployment remained unchanged at 5.5% in August 2023 from the previous month, while wage gains remained solid, supported by resilient job growth in the economy. However, the significantly higher mortgage rates, coupled with the highly indebted households has started to put pressure on consumption, adding to investor's concerns. The 10-year bond yield increased from 3.17% to 4.03%, while the yield on

AGF Short-Term Income Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2023

the 2-year bond increased from 3.79% to 4.87%, indicating a further inversion and causing government bonds to under-perform.

Despite the significant tightening so far, the global economic outlook remains somewhat resilient. Inflation has remained sticky, and though it may continue to decelerate in the coming months, central banks remain vigilant about the risk of a resurgence in 2023 and beyond. Meanwhile, policymakers have projected above-target inflation in the next couple of years. As a result, the bar remains high for central banks to cut interest rates soon unless the growth profile deteriorates significantly. Many developed market yield curves have remained substantially inverted for some time, which historically has been a leading indicator of slowing economic growth.

Given the gyrations in the bond market and a continuation of the hiking cycle, the Fund is positioned defensively from a credit standpoint, expecting economic growth to become more subdued as the market progresses through the last calendar quarter of 2023 and beyond. This should benefit sovereign bonds to which the Fund has a large overweight. Furthermore, the portfolio manager does not see the need to take excessive credit risk to achieve a reasonable and high quality mid-single-digit yield.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$192,000 were incurred by the Fund during the period ended September 30, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$26,000 were incurred by the Fund during the period ended September 30, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as

"expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable.

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	October 1994
Series F Shares	January 2000

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding income tax, foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

AGF Short-Term Income Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2023

course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	1.00%	15.80%	84.20%
Series F Shares	0.75%	-	100.00%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2023 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Series F Shares

Annual Compound Returns

The following table compares the historical annual compound returns for each series with the index, for each of the periods ended September 30, 2023.

Percentage Return:	Since Inception					
	1 Year	3 Years	5 Years	10 Years	Since Inception	
Mutual Fund Shares		1.0	(1.9)	0.2	0.4	N/A
Bloomberg Canadian Aggregate 1-5 Year Index		1.6	(1.1)	1.1	1.3	N/A
Series F Shares		1.4	(1.6)	0.6	0.7	N/A
Bloomberg Canadian Aggregate 1-5 Year Index		1.6	(1.1)	1.1	1.3	N/A

The Bloomberg Canadian Aggregate 1-5 Year Index measures the Canadian investment grade fixed income market with 1-5 year maturities.

For a discussion of the relative performance of the Fund as compared to the index, see Results of Operations in the Management Discussion of Fund Performance.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
