

Annual Management Report of Fund Performance

AGF Global Strategic Income Fund

September 30, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Global Strategic Income Fund (formerly, AGF Strategic Income Fund) (the "Fund") is to provide long-term capital growth and income with moderate risk. The Fund uses an asset allocation approach and invests primarily in a diversified mix of funds and exchange traded funds ("ETFs") that provide exposure to global equity and fixed income securities. AGF Investments Inc. ("AGFI"), as portfolio manager, uses a top-down approach to asset allocation and generally allocates the Fund's assets among underlying mutual funds (the "Underlying Funds") and ETFs, which are primarily managed by AGFI or an AGFI affiliate. A top-down investment approach involves looking at the "big picture" in the economy and financial world and then breaking those components down into finer details. The portfolio manager has set, and reviews, target dynamic allocations between the Underlying Funds and ETFs for the Fund's portfolio, consistent with the Fund's investment objective. Asset allocation starts with a macro review of global economies. The portfolio manager then determines the risk and return potential of each asset class to inform the weightings of each asset class in the Fund. During periods of market downturn or for other reasons, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund

The Fund continues to be suitable for income-oriented investors investing for the medium to long-term, seeking a managed portfolio of equity and fixed income securities in a single fund and who have low to medium tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2023, the Mutual Fund Units of the Fund returned 2.4% (net of expenses) while the S&P/TSX Composite Index ("S&P/TSX Index"), the Bloomberg Global Aggregate Index and the Blended Benchmark returned 9.5%, 0.5% and 10.6%, respectively. The Blended Benchmark is composed of 40% S&P/TSX

Index/20% MSCI All Country World Net Index/16% Bloomberg Emerging Markets USD Aggregate Index (hedged to CAD)/16% Bloomberg Global High-Yield Index (hedged to CAD)/8% Bloomberg Global Aggregate Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the S&P/TSX Index primarily due to the inclusion of fixed income assets, particularly rate-sensitive government bonds. The equity exposure within the Fund also under-performed the benchmark due to stock selection. The Fund's overall performance was hindered by its exposure to fixed income assets in general, which under-performed equities over the reporting period.

The Fund out-performed the Bloomberg Global Aggregate Index due to the inclusion of equities and infrastructure. Both of these asset categories broadly out-performed fixed income over the reporting period. The fixed income portion of the Fund out-performed the benchmark due to duration positioning and exposure to high yield bonds, which did relatively well over the reporting period. Duration is a measure of the sensitivity of the portfolio to changes in interest rates.

The Fund under-performed the Blended Benchmark due to the under-performance of the Canadian equity component. The combined equity components of the Fund were overweight relative to the Blended Benchmark, but under-performed mostly due to stock selection on the Canadian side. Within equities, the Fund's exposure to infrastructure assets under-performed the equity portion of the Blended Benchmark. The fixed income component was underweight relative to the Blended benchmark and slightly out-performed due to duration positioning and exposure to high yield bonds. Equity assets generally out-performed fixed income assets from a category perspective over the reporting period.

At the securityholder meeting held on June 15, 2023, the Fund's change of investment objective and strategies was approved. On June 29, the Fund sold off its direct holdings in equity and fixed income securities and commenced investing in a diversified mix of funds and ETFs. At the end of the reporting period, the Fund held approximately 62.0% in equities and 37.0% in fixed income, via its holdings in the Underlying Funds and ETFs, as well as approximately 1.0% in AGF SAF Private Credit Limited Partnership, which is managed by AGF SAF Private Credit Management LP. In addition, the Fund was also renamed on June 30, 2023 to better align with the new investment objective.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Certain series of the Fund, as applicable, make monthly distributions at a rate determined by AGFI from time to time. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net redemptions of approximately \$31 million for the current period, as compared to net redemptions of approximately \$20 million in the prior period. The portfolio manager does not believe that redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have decreased as compared to the previous period due mainly to a decrease in average Net Asset Values. The decrease in custodian fees was due to changes in the rates charged by the custodian during the period. The decrease in independent review committee fees was due to additional meetings held in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Bond markets remained volatile over the reporting period, driven by variable economic data, geopolitical turmoil, the U.S. debt ceiling standoff, the banking system turmoil and central bank policies. Inflation levels broadly moderated but remained elevated versus target levels, and resilient economic activity also supported further central bank rate hikes, albeit at a more moderate pace. In recognition of the decelerating pace of inflation and the fact that monetary policy acts with a long and variable lag, the Bank of Canada ("BoC") elected to pause its rate hike campaign after raising rates in January 2023 by 0.25%. However, considering the surprisingly strong consumer sentiment and positive economic data, the BoC decided to restart its hiking cycle in June 2023 and raised rates by 0.25% at each of its meetings in June and July. The BoC kept rates unchanged at 5.0% at its September 2023 meeting, marking another pause in its tightening cycle in response to a slowdown in Canada's economy in the second calendar quarter of 2023.

The U.S. economy grew 2.1% in the second calendar quarter of 2023 versus a 2.4% advanced forecast, following a downward revision in August 2023. Furthermore, consumer spending was revised lower to 0.8% growth versus the previous expectation of 1.7%, signaling a potential turn in the consumer strength. The unemployment rate has remained relatively rangebound throughout 2023 but has ended the third calendar quarter higher at 3.8%, the highest level since February of 2022. The U.S. Federal Reserve kept the federal

funds rate unchanged in its September 2023 meeting at a 22-year high of 5.25%-5.50%, following a 0.25% rate hike in July 2023; however, it indicated there remained a chance of another hike in 2023. Despite lower consumer spending, the consumer price index rose for the second consecutive month to 3.7% in August 2023 from 3.2% in July 2023, led by an increase in oil prices. However, core inflation, which excludes food and energy, slowed for the fifth month to 4.3%. Consumer sentiment decreased to 68.1 in September 2023 from 69.5 in August 2023 due to higher food and energy prices that hurt consumers' purchasing power. Consumer sentiment is an economic indicator that measures how optimistic consumers feel about their finances and the state of the economy.

Elsewhere, China's economy grew by 6.3% year over year in the second calendar quarter of 2023, compared with a growth of 4.5% in the previous quarter; however, it fell short of the market estimate of 7.3%. China has set a growth target of around 5.0% for 2023, following a 3.0% expansion in 2022. In June 2023, China's economic indicators presented a mixed picture wherein retail sales rose much softer while industrial output growth accelerated. Previously released data showed that China's exports declined the most in three years due to high inflation in key markets and geopolitical factors that affected overseas demand. The worsening real estate crisis, which has put developers such as The China Evergrande Group and Country Garden Holdings Company Limited in a precarious position, has also contributed to China's economic slowdown.

Emerging markets bond performance varied considerably over the reporting period. Local currency-denominated debt (expressed in local currency) marginally out-performed hard currency debt overall, while the local index expressed in U.S. dollars saw a wider margin of out-performance as the dollar weakened over the reporting period versus emerging markets currencies. Many emerging markets central banks were early in raising rates, and now with inflation trending lower, some countries have started cutting rates before their developed markets peers.

Global investment grade bonds delivered positive returns over the reporting period, supported by the declining inflation profile and elevated concerns of slower economic growth in China. The U.S. treasury yield curve inverted further with the 10-year yield increasing from 3.83% to 4.57% and the 2-year treasury yield increasing from 4.28% to 5.04%. Meanwhile, the Canada 10-year bond yield increased from 3.17% to 4.03%, while the yield on the 2-year bond increased from 3.79% to 4.87%, indicating a further inversion, and causing government bonds to under-perform. Credit spreads were erratic, particularly between November 2022 to May 2023, but overall tightened substantially during the reporting period, and most credit categories out-performed government bonds on higher carry versus their safer counterparts. Carry is the difference between the yield on a longer-maturity bond and the cost of borrowing.

Despite the significant tightening so far, the global economic outlook remains somewhat resilient. Inflation has remained sticky, and though it may continue to decelerate in the coming months, central banks remain vigilant about the risk of a resurgence in 2023 and beyond. Meanwhile, policymakers have projected above-target inflation in the next couple of years. As a result, the bar remains high for central banks to cut interest rates soon unless the growth profile deteriorates significantly. Many developed markets yield curves have remained substantially inverted for some time, which historically has been a leading indicator of slowing economic growth.

The portfolio manager continues to believe the North American equity markets will remain well-positioned in the current volatile environment. As inflation raised its head again, the BoC hiked rates in July 2023 but refrained from doing so again during the most recent meeting in September. Even in this inflationary environment, the portfolio manager believes the investment narrative should continue to improve and provide a better backdrop for equities.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$9,259,000 were incurred by the Fund during the period ended September 30, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$690,000 were incurred by the Fund during the period ended September 30, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as

"expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

Mutual Fund Units	July 1931
Series F Units	January 2000
Series O Units	June 2005
Series Q Units	May 2018
Series T Units	December 2006
Series V Units	August 2007
Series W Units	May 2018

- c) On May 15, 2020, AGF Tactical Income Fund merged into the Fund. The financial data of the Fund includes the results of operations of AGF Tactical Income Fund from the date of the merger.
- (2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee distributions, if applicable (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.
- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.

- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.25%	46.30%	53.70%
Series F Units	0.90%	-	100.00%
Series T Units	2.25%	42.32%	57.68%
Series V Units	2.25%	47.21%	52.79%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money. During the ten year period ended September 30, 2023, certain other funds with similar investment objectives merged into the Fund. Generally, for fund mergers, the continuing fund is considered a new fund for the purpose of calculating rates of return and therefore,

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

the rates of return have not been provided for the period of the merger and previous periods. However, the merger of AGF Tactical Income Fund with the Fund (see Explanatory Note (1) c)) and the mergers of AGF Traditional Income Fund and AGF Conservative Asset Allocation Fund with the Fund in August 2018 and May 2014, respectively, did not constitute material changes to the Fund and accordingly did not impact the ability of the Fund to maintain its historical performance.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2023 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

S&P/TSX Composite Index	9.5	9.9	7.3	N/A	6.9
Bloomberg Global Aggregate Index	0.5	(6.3)	(0.6)	N/A	(0.9)
Bloomberg Canada Aggregate Index	(1.4)	(5.1)	0.0	N/A	(0.1)
Blended Benchmark	10.6	4.3	4.8	N/A	4.7
Old Blended Benchmark	5.2	3.9	4.8	N/A	4.5

Effective July 1, 2023, the Fund's secondary benchmark was changed from Bloomberg Canada Aggregate Index to Bloomberg Global Aggregate Index and its Old Blended Benchmark, which comprised 60% S&P/TSX Composite Index/40% Bloomberg Canada Aggregate Index, was changed to the Blended Benchmark to better reflect the core investable universe of the Fund's portfolio.

The S&P/TSX Composite Index is a capitalization-weighted index designed to measure market activity of stocks and trusts listed on the Toronto Stock Exchange.

The Bloomberg Global Aggregate Index provides a broad-based measure of the global investment grade fixed income markets.

The MSCI All Country World Net Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Bloomberg Emerging Markets USD Aggregate Index (hedged to CAD) is a flagship hard currency emerging markets debt benchmark that includes U.S. dollar denominated debt from sovereign, quasi-sovereign and corporate emerging markets issuers. This is a variation hedged to Canadian dollars.

The Bloomberg Global High-Yield Index (hedged to CAD) is a multi-currency flagship measure of the global high yield debt market and this is a variation hedged to Canadian dollars.

The Bloomberg Canada Aggregate Index provides a broad-based measure of the Canadian investment grade fixed income market.

For a discussion of the relative performance of the Fund as compared to the indices, see Results of Operations in the Management Discussion of Fund Performance.

Summary of Investment Portfolio

As at September 30, 2023

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2023.

The prospectus and other information about the underlying investment funds and ETFs are available on the internet at www.sedar.com.
