

Annual Management Report of Fund Performance

AGF Total Return Bond Class

September 30, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

As described in the Simplified Prospectus, the investment objective of AGF Total Return Bond Class (the "Fund") is to provide interest income and capital appreciation by investing in debt securities of governments and other issuers around the world. To achieve this objective, the Fund currently invests in units of AGF Total Return Bond Fund (the "Underlying Fund") and may also invest directly in securities similar to those held by the Underlying Fund. AGF Investments Inc. ("AGFI"), as portfolio manager, seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to country allocation, category allocation and duration management. A bottom-up investment approach focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. A top-down investment approach involves looking at the "big picture" in the economy and financial world and then breaking those components down into finer details. Duration exposure is the sensitivity of the portfolio due to changes in interest rates. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit. The Fund may also invest in below investment grade government and corporate debt (i.e. a credit rating below BBB from Standard & Poor's or an equivalent rating from another rating agency) as well as floating rate loans. During periods of market downturn or for other reasons, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The Fund continues to be suitable for investors investing for the medium to longer term and who have low tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2023, the Mutual Fund Shares of the Fund returned 0.2% (net of expenses) while the Bloomberg Global High-Yield Index and the Blended Benchmark returned 11.5% and 7.4%, respectively. The Blended Benchmark is composed of 40% Bloomberg

Emerging Markets USD Aggregate Index (hedged to CAD)/40% Bloomberg Global High-Yield Index (hedged to CAD)/20% Bloomberg Global Aggregate Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of the Underlying Fund, a fund managed by AGFI. The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure.

The Fund under-performed the Bloomberg Global High-Yield Index due to the Underlying Fund's exposure to other fixed income categories in addition to high yield versus the benchmark which is 100% high yield. The Underlying Fund's underweight exposure to high yield corporate bonds was a detracting factor, as resilient economic conditions supported corporate credit overall, causing spreads to narrow. The Underlying Fund also has exposure to sovereign bonds, in expectation of economic growth being challenged going forward. However, the Underlying Fund had a significant underweight to the U.S. dollar relative to the benchmark, comprised of mostly the U.S. dollar, which contributed to relative performance as the U.S. dollar struggled against the Canadian dollar over the reporting period. The Underlying Fund's allocation to the U.S. dollar was tactically managed throughout the reporting period but was overall lower compared to the beginning of the period. The Underlying Fund increased its allocation to European treasuries as a more benign growth environment in Europe is expected to keep the European Central Bank ("ECB") less hawkish than the U.S. Federal Reserve (the "Fed").

The Fund under-performed the Blended Benchmark due to the Underlying Fund's underweight allocation to high yield corporate bonds and overweight allocation to sovereign bonds. Resilient economic conditions supported corporate credit overall, causing spreads to narrow. The Underlying Fund has an overweight allocation to sovereign bonds relative to the Blended Benchmark, in expectation of economic growth being challenged going forward. The Underlying Fund's overweight allocation to the U.S. dollar was also a detractor, while its overweight allocation to the Euro contributed positively to relative performance. In order to reduce the Underlying Fund's exposure to U.S. treasuries, the Underlying Fund shifted some of its allocation to Europe, which was a net benefit over the reporting period.

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2023

The Underlying Fund entered into foreign exchange forward contracts during the period under review. As of September 30, 2023, the Underlying Fund was long Canadian dollar and short Czech Republic Koruna, Euro, Mexican Peso, Pound Sterling and U.S. dollar in order to hedge its currency exposure.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net redemptions of approximately \$9 million for the current period, as compared to net redemptions of approximately \$18 million in the prior period. The portfolio manager does not believe that redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. Expenses have decreased as compared to the previous period due mainly to a decrease in average Net Asset Values. The increase in interest expense was due to an increase in overdraft positions throughout the period. The decrease in registration fees and independent review committee fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Bond markets remained volatile over the reporting period, driven by variable economic data, geopolitical turmoil, the U.S. debt ceiling standoff, the banking system turmoil and central bank policies. Inflation levels broadly moderated but remained elevated versus target levels, and resilient economic activity also supported further central bank rate hikes, albeit at a more moderate pace. In recognition of the decelerating pace of inflation as well as the fact that monetary policy acts with a long and variable lag, the Bank of Canada ("BoC") elected to pause its rate hike campaign after raising rates in January 2023 by 0.25%. However, considering the surprisingly strong consumer sentiment and positive economic data, the BoC decided to restart its hiking cycle in June 2023 and raised rates by 0.25% at each of its meetings in June and July 2023. The BoC kept rates unchanged at 5.0% at its September 2023 meeting, marking another pause in its tightening cycle in response to a slowdown in Canada's economy in the second calendar quarter.

The U.S. economy grew 2.1% in the second calendar quarter of 2023 versus the 2.4% advanced forecast, following a downward revision in August 2023. Furthermore, consumer spending was revised lower to 0.8% growth versus the

previous expectation of 1.7%, signaling a potential turn in consumer strength. The unemployment rate has remained relatively rangebound throughout 2023 but has ended the third calendar quarter higher at 3.8%, the highest level since February of 2022. The Fed kept the federal funds rate unchanged in its September 2023 meeting at a 22-year high of 5.25%-5.50%, following a 0.25% rate hike in July 2023; however, it indicated there remained a chance of another hike by the end of 2023. Despite lower consumer spending, the consumer price index rose for the second consecutive month to 3.7% in August 2023 from 3.2% in July 2023, led by an increase in oil prices. However, core inflation, which excludes food and energy, slowed for the fifth month to 4.3%. Consumer sentiment decreased to 68.1 in September 2023 from 69.5 in August 2023 due to higher food and energy prices that hurt consumers' purchasing power. Consumer sentiment is an economic indicator that measures how optimistic consumers feel about their finances and the state of the economy.

The U.S. Dollar Index declined over the reporting period despite the Fed continuing its tightening cycle to achieve its 2.0% inflation target. In September 2023, the ECB raised interest rates for the tenth consecutive time. The ECB also indicated that it is likely done with tightening monetary policy, citing meaningful progress against inflation. The annual inflation rate in the Euro area was 5.2% in August 2023, the lowest since January 2022, but remains much above the ECB target of 2.0%.

Elsewhere, China's economy grew by 6.3% year over year in the second calendar quarter of 2023, compared with a growth of 4.5% in the previous quarter; however, it fell short of the market estimate of 7.3%. China has set a growth target of around 5.0% for 2023, following a 3.0% expansion in 2022. In June 2023, China's economic indicators presented a mixed picture wherein retail sales rose much softer while industrial output growth accelerated. Previously released data showed that China's exports declined the most in three years due to high inflation in key markets and geopolitical factors that affected overseas demand. The worsening real estate crisis, which has put developers such as China Evergrande Group and Country Garden Holdings Company Limited in a precarious position, has also contributed to China's economic slowdown.

Emerging markets bond performance varied considerably over the reporting period. Local currency-denominated debt (expressed in local currency) out-performed hard currency debt, while the local index expressed in U.S. dollar saw a wider margin of out-performance as the dollar weakened over the reporting period versus emerging markets currencies. Many emerging markets central banks were early in raising rates, and now with inflation trending lower, some countries have started cutting rates before their developed markets peers.

Global investment grade bonds delivered positive returns over the reporting period, supported by the declining inflation profile and elevated concerns of slower economic growth in China. The U.S. treasury yield curve inverted further with the

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2023

10-year yield increasing from 3.83% to 4.57% and the 2-year treasury yield increasing from 4.28% to 5.04%. Meanwhile, the Canada 10-year bond yield increased from 3.17% to 4.03%, while the yield on the 2-year bond increased from 3.79% to 4.87%, indicating a further inversion and causing government bonds to under-perform. Credit spreads were erratic, particularly between November 2022 to May 2023, but overall tightened substantially during the reporting period, and most credit categories out-performed government bonds on higher carry versus their safer counterparts. Carry is the difference between the yield on a longer-maturity bond and the cost of borrowing.

Despite the significant tightening so far, the global economic outlook remains somewhat resilient. Inflation has remained sticky, and though it may continue to decelerate in the coming months, central banks remain vigilant about the risk of a resurgence in 2023 and beyond. Meanwhile, policymakers have projected above-target inflation in the next couple of years. As a result, the bar remains high for central banks to cut interest rates soon unless the growth profile deteriorates significantly. Many developed markets yield curves have remained substantially inverted for some time, which historically has been a leading indicator of slowing economic growth.

Given the gyrations in the bond market and a continuation of the hiking cycle, the Underlying Fund is positioned defensively from a credit standpoint, expecting economic growth to become more subdued with progress through the last calendar quarter of 2023 and beyond. This should benefit sovereign bonds to which the Underlying Fund has a large overweight. Furthermore, the portfolio manager does not see the need to take excessive credit risk to achieve a reasonable and high quality mid-single-digit yield.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$3,098,000 were incurred by the Fund during the period ended September 30, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$168,000 were incurred by the Fund during the period ended September 30, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2016
Series F Shares	April 2016
Series FV Shares	November 2018
Series Q Shares	April 2016
Series V Shares	November 2018
Series W Shares	October 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series FV and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV and Series V Shares as applicable, is as follows:

As at	Sept 30, 2023 (\$)	Sept 30, 2022 (\$)	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)
Series FV Shares	8.85	9.42	9.95	10.16	10.68
Series V Shares	8.75	9.21	9.72	10.05	10.49

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding income tax, foreign withholding taxes, commissions and other portfolio transaction

* represents initial Net Assets
(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

SEPTEMBER 30, 2023

costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well

as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	1.45%	28.60%	71.40%
Series F Shares	0.70% ^(a)	-	100.00%
Series FV Shares	0.70% ^(a)	-	100.00%
Series V Shares	1.45%	23.30%	76.70%

(a) 0.75% for the period prior to June 1, 2023

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2023 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Performance for 2016 represents returns for the period from April 28, 2016 to September 30, 2016.

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
