

Annual Management Report of Fund Performance

AGF Emerging Markets Fund

September 30, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Investment Objective and Strategies

Pursuant to the Declaration of Trust, the investment objective of AGF Emerging Markets Fund (the "Fund") is to provide superior capital growth by investing primarily in shares of companies that are located or active mainly in emerging market countries. AGF Investments Inc. ("AGFI"), as portfolio manager, uses a bottom-up stock selection process to identify stocks that are trading at a significant discount to what it believes is their underlying earnings potential. A bottom-up investment approach focuses attention on a specific company rather than on the industry in which that company operates or on the economy as a whole. The portfolio manager intends to invest primarily in issuers located in emerging markets, as defined by the MSCI Emerging Markets Index, as well as issuers located in Hong Kong and Singapore. When evaluating companies, the portfolio manager focuses on those with strong long-term earnings, growth, excellent management teams and dominance of their underlying markets. This disciplined approach to investing also ensures broad diversification across countries and sectors. During periods of market downturn or for other reasons, a significant portion of the Fund's assets may be held in cash, cash equivalents or fixed income securities.

Risk

The risks of investing in the Fund remain as disclosed in the current prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The Fund continues to be suitable for investors investing for the longer term, seeking the growth potential of equity securities of emerging market countries and who have medium tolerance for risk. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

For the year ended September 30, 2023, the Mutual Fund Units of the Fund returned 6.1% (net of expenses) while the MSCI Emerging Markets Index returned 10.3%. Unlike the benchmark, the Fund may be subject to valuation adjustments as outlined in the Fund's valuation policies as it relates to non-North American equities held by the Fund. A fair value adjustment can either positively or negatively impact the Fund's rate of return. The performance of the other series of the Fund is substantially similar to that of the

Mutual Fund Units, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund under-performed the MSCI Emerging Markets Index due to security selection in Brazil and China, while partially offset by positive selection in India. While sector allocation is a by-product of active country and security decisions, the Fund's exposure to the Information Technology, Consumer Staples and Health Care sectors detracted from performance during the reporting period. Conversely, the Fund's exposure to the Consumer Discretionary, Industrials and Materials sectors positively contributed to returns.

The Fund had net redemptions of approximately \$226 million for the current period, as compared to net redemptions of approximately \$74 million in the prior period. Rebalancing by fund on fund programs resulted in net redemptions of approximately \$217 million in the Fund. The portfolio manager does not believe that redemption activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period as compared to the previous period due to a decrease in average Net Asset Values. Unitholder servicing and administrative fees also decreased during the period as a result of the decreased average Net Asset Values. The increase in interest expense was due to an increase in overdraft positions throughout the period. The decreases in audit fees and independent review committee fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Emerging economies, excluding China, enjoyed a mostly favourable economic environment in 2023 up until the end of the reporting period, characterized by what is called a 'Goldilocks' scenario, marked by positive growth surprises and subdued inflation. However, this favourable backdrop faced some recent challenges due to unexpected inflationary pressures from rising food and energy prices. These inflationary spikes are likely transient, though surprising demand strength in select emerging markets (excluding China) further complicated the situation. Nevertheless, the relatively subdued recovery in China acted as a mitigating factor, helping to alleviate inflationary pressures across the

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

broader spectrum of the emerging markets. The portfolio manager expects this situation to persist until China's economic recovery gains more significant momentum.

Potential risks to the emerging markets' inflation outlook include the possibility of a more robust economic recovery in China, potentially spurred by larger-than-expected stimulus, a further appreciation of the U.S. dollar and isolated spikes in food prices, potentially triggered by events such as El Niño later in the year. Notably, any additional economic weakness in China is likely to contribute to continued disinflation in the emerging markets, possibly resulting in slower economic growth.

Authorities in China have thus far employed relatively modest monetary tools and fiscal measures to stimulate the economy. This approach has left markets somewhat underwhelmed. The likelihood of a substantial stimulus similar to those seen during the 2008-2009 and 2015-2016 downturns appears improbable. This is partly due to the Chinese government's commitment to transition the economy away from a reliance on real estate and infrastructure investments toward consumption-led growth. Additionally, China's fiscal position has weakened compared to previous economic downturns, characterized by lower fiscal revenues due to prior tax policies and significantly elevated debt levels. However, it is essential to note that the portfolio manager anticipates China will continue to build on its recent policy momentum, aiming to boost sentiment, stabilize property markets and support overall economic growth. Consequently, the portfolio manager expects China's economic activity to gain momentum later in the year and extend into 2024. This could result in positive spill-over effects on other emerging and developed economies, potentially leading to a widening gap between the economic growth of emerging and developed markets. Historically, such disparities have favoured emerging market equities, typically out-performing their developed market counterparts during these periods.

Many central banks in the emerging markets have taken a proactive stance by implementing policy rate cuts. Countries that began rate hikes ahead of the U.S. Federal Reserve (the "Fed"), including Brazil and Chile, have benefited from lower policy rates. Their resilience against the backdrop of the Fed's higher-for-longer stance is attributed to the Fed's transparent communication and its proximity to the end of its tightening cycle. However, the potential challenge of a strengthening U.S. dollar remains a risk. If the U.S. dollar continues to appreciate, it could disrupt inflation expectations, potentially leading emerging markets' central banks to reconsider further rate cuts.

Related Party Transactions

AGFI is the manager ("Manager") and trustee of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Units, if

applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$8,862,000 were incurred by the Fund during the period ended September 30, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Units, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$1,214,000 were incurred by the Fund during the period ended September 30, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international

economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five years as applicable.

Mutual Fund Units - Net Assets per Unit⁽¹⁾

For the periods ended	Sept 30, 2023 (\$)	Sept 30, 2022 (\$)	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per unit presented in the financial statements ("Net Assets") and the net asset value per unit calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Series Q Units	December 2012
Series W Units	May 2018

(2) Net Assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash/reinvested in additional units of the Fund, or both. The computation of the distributions per unit does not take into account the management fee

(1), (2), (3), (4), (5), (6), (7) and (8) see Explanatory Notes

distributions, if applicable (see note 5 below). The characterization of the distributions is based on management's estimate of the actual income for the year.

- (4) This is not a reconciliation of the beginning and ending Net Assets per unit.
- (5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of the underlying funds and exchange traded funds ("ETFs") in which the Fund has invested, allocated to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched during the period, the MER is annualized from the date of the first external purchase.

AGFI may reduce the effective management fee payable by some unitholders by reducing the management fee it charges to the Fund and directing the Fund to make management fee distributions to these unitholders in amounts equal to the amounts of the management fee reduction. The MER does not take into account the reduction in management fees due to management fee distributions to unitholders.

- (6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.
- (7) The trading expense ratio represents total commissions and other portfolio transaction costs, including the Fund's proportionate share of the commissions, if applicable, of the underlying funds and ETFs in which the Fund has invested, expressed as an annualized percentage of average daily Net Asset Value during the period.
- (8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q

and Series W Units, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's units, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Units	2.00%	15.19%	84.81%
Series F Units	0.90% ^(a)	-	100.00%

(a) 1.00% for the period prior to June 1, 2023

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2023 as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Units

* The indicated rates of return shown here are the historical annual compounded total returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

Series F Units

Series I Units

Performance for 2018 represents returns for the period from January 10, 2018 to September 30, 2018.

Series O Units

Series Q Units

Series W Units

Performance for 2019 represents returns for the period from November 6, 2018 to September 30, 2019.

Annual Compound Returns

The following table compares the historical annual compound returns for each series with the index, for each of the periods ended September 30, 2023.

Percentage Return:	1 Year	3 Years	5 Years	10 Years	Since Inception
Mutual Fund Units	6.1	(3.6)	(1.3)	1.8	N/A
MSCI Emerging Markets Index	10.3	(0.7)	2.0	5.3	N/A
Series F Units	7.4	(2.4)	(0.1)	3.0	N/A
MSCI Emerging Markets Index	10.3	(0.7)	2.0	5.3	N/A
Series I Units	8.8	(1.2)	1.1	N/A	0.4
MSCI Emerging Markets Index	10.3	(0.7)	2.0	N/A	0.3
Series O Units	8.8	(1.1)	1.2	4.6	N/A
MSCI Emerging Markets Index	10.3	(0.7)	2.0	5.3	N/A
Series Q Units	8.8	(1.1)	1.2	4.6	N/A
MSCI Emerging Markets Index	10.3	(0.7)	2.0	5.3	N/A
Series W Units	8.8	(1.4)	N/A	N/A	1.9
MSCI Emerging Markets Index	10.3	(0.7)	N/A	N/A	2.8

The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets.

For a discussion of the relative performance of the Fund as compared to the index, see Results of Operations in the Management Discussion of Fund Performance.

Summary of Investment Portfolio

As at September 30, 2023

The major portfolio categories and top holdings (up to 25) of the Fund at the end of the period are indicated in the following tables. The Summary of Investment Portfolio may change due to ongoing portfolio transactions of the Fund and the next quarterly update will be in the Quarterly Portfolio Disclosure as at December 31, 2023.

Portfolio by Country	Percentage of Net Asset Value (%)
China	32.4
India	12.7
Taiwan	12.2
South Korea	12.1
Brazil	5.1
Hong Kong	4.7
Cash & Cash Equivalents	4.6
Indonesia	3.9
