

Interim Management Report of Fund Performance

AGF Total Return Bond Class

March 31, 2023

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2023

Management Discussion of Fund Performance

This management discussion of fund performance represents the portfolio management team's view of the significant factors and developments affecting the fund's performance and outlook.

Results of Operations

For the six months ended March 31, 2023, the Mutual Fund Shares of AGF Total Return Bond Class (the "Fund") returned 3.7% (net of expenses) while the Bloomberg Global High-Yield Index and the Blended Benchmark returned 9.0% and 8.2%, respectively. The Blended Benchmark is composed of 40% Bloomberg Emerging Markets USD Aggregate Index (hedged to CAD)/40% Bloomberg Global High-Yield Index (hedged to CAD)/20% Bloomberg Global Aggregate Index. The performance of the other series of the Fund is substantially similar to that of the Mutual Fund Shares, save for differences in expense structure. Refer to "Past Performance" section for performance information of such series.

The Fund holds Series I Units of AGF Total Return Bond Fund (the "Underlying Fund"), a fund managed by AGF Investments Inc. ("AGFI"). The discussion below references performance figures for Mutual Fund Units of the Underlying Fund. The performance of Series I Units is substantially similar to that of Mutual Fund Units, save for differences in expense structure.

The Fund under-performed the Bloomberg Global High-Yield Index due to the Underlying Fund having exposure to other fixed income categories in addition to high yield versus the benchmark which is 100% high yield. The Underlying Fund's underweight exposure to high yield corporate bonds was a detracting factor, as high yield bonds out-performed sovereign and investment grade bonds over the reporting period. Credit markets benefited from markets anticipating that central banks would be less aggressive. Inflation, although very elevated, was also starting to show signs of peaking. The Underlying Fund also had a bias towards higher quality bonds which detracted from relative performance in a risk-on environment. During a market sentiment of 'risk-on', the market is optimistic and more willing to take risk in exchange for possibly better returns. Although the Underlying Fund's exposure to emerging markets bonds denominated in local currency performed well over the reporting period, the Underlying Fund was underweight emerging markets overall. The Underlying Fund's shorter duration position also somewhat detracted from relative performance. Duration exposure is the sensitivity of the portfolio due to changes in interest rates. In terms of

currency exposure, the Underlying Fund maintained a partial hedge on the U.S. dollar which was a net contributor as the Canadian dollar was stronger relative to the U.S. dollar.

The Fund under-performed the Blended Benchmark due to the Underlying Fund's underweight allocation to high yield corporate bonds, which out-performed lower beta fixed income categories. Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. Corporate credit spreads tightened as credit markets benefited from markets anticipating that central banks would be less aggressive. Inflation, although very elevated, was also starting to show signs of peaking. Even though the Underlying Fund's overweight exposure to emerging markets bonds denominated in local currency was a net benefit, its underweight exposure to emerging markets overall relative to the Blended Benchmark detracted from relative performance. In terms of currency exposure, the Underlying Fund maintained a partial hedge on the U.S. dollar and despite this partial hedge being reduced over the reporting period, the Underlying Fund's overall net U.S. dollar exposure was a detractor as it was a significant overweight relative to the Blended Benchmark.

The Underlying Fund entered into foreign exchange forward contracts during the period under review. As of March 31, 2023, the Underlying Fund was long Canadian dollar and short Chinese Yuan Renminbi, Czech Republic Koruna, Euro, Mexican Peso, Pound Sterling and U.S. dollar in order to hedge its currency exposure.

Certain series of the Fund, as applicable, make monthly distributions of capital at a rate determined by AGFI from time to time. The portfolio manager does not believe that the distributions made by the Fund had a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objectives.

The Fund had net subscriptions of approximately \$6 million for the current period, as compared to net subscriptions of approximately \$8 million in the prior period. The portfolio manager does not believe that subscription activity had a meaningful impact on the Fund's performance or the ability to implement its investment strategy.

Total expenses before foreign withholding taxes, commissions and other portfolio transaction costs vary period over period mainly as a result of changes in average Net Asset Values (see Explanatory Note (1) a)) and investor activity, such as number of investor accounts and transactions. The decrease in management fees accounted for most of the decrease in expenses during the period when compared to the previous period due to a decrease in average Net Asset Values. The increase in interest expense was due to an increase in overdraft positions throughout the

This interim management report of fund performance contains financial highlights, but does not contain either the interim or annual financial statements of the investment fund. You can get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1 800 268-8583, by writing to us at AGF Investments Inc., CIBC SQUARE, Tower One, 81 Bay Street, Suite 4000, Toronto, Ontario, Canada M5J 0G1 attention: Client Services, or by visiting our website at www.agf.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2023

period. The increase in registration fees and decrease in independent review committee fees were due to variances between the accrued amounts versus the actual expenses incurred in the previous period. All other expenses remained fairly consistent throughout the periods.

Recent Developments

Bond markets remained volatile over the reporting period, driven by variable economic data, the banking system turmoil that arose in March 2023, central bank policies and the markets' reaction to them. Inflation levels broadly moderated but remained elevated versus target levels, and resilient economic activity also supported further central bank rate hikes, albeit at a more moderate pace. In recognition of the decelerating pace of inflation and growth, as well as the fact that monetary policy acts with a long and variable lag, the Bank of Canada ("BoC") elected to pause its rate hike campaign after raising rates in October 2022, December 2022 and January 2023. The U.S. Federal Reserve (the "Fed") and European Central Bank's tightening cycles continued at a slower pace in an effort to contain elevated inflation while striving to avoid too hard an impact on economic activity through braking too aggressively. The U.S. dollar declined during the reporting period and Fed Chairman Jerome Powell cautioned that taming inflation might take longer than previously anticipated. Elsewhere, China's long-awaited economic rebound helped the global economic outlook somewhat after the country abandoned its zero-COVID policy. As Russia's invasion of Ukraine passed the one-year mark, NATO member nations pledged their unwavering support to Ukraine.

The U.S. economy grew 2.6% in the last calendar quarter of 2022, fueled by an increase in inventory investment and consumer spending, partly offset by a decline in housing investment. In January 2023, the unemployment rate hit a 50-year low of 3.4% and moved up to 3.6% in February. Inflation fell to 6.0% year on year in February 2023, the lowest since September 2021.

Bond prices were lower in February 2023 due to strong global economic data, prompting comments from the Fed pushing back on market expectations of cuts later in the year. These moves reversed most of the previous gains made over the reporting period. However, the bond market rally resumed in March 2023 as news of regional bank failures hit the headlines and reintroduced the narrative of this tightening cycle nearing an end. The Fed still raised the federal funds rate by 0.25% to a range of 4.75% to 5.00% in March 2023, pushing borrowing costs to the highest since 2007. Consumer sentiment fell for the first time in four months to 63.4 in March 2023 from 67.0 in February 2023, which was the highest since January 2022. Consumer sentiment is an economic indicator that measures how optimistic consumers feel about their finances and the state of the economy. In March 2023, the central bank noted that the U.S. banking sector is resilient despite recent developments surrounding SVB Financial Group and other regional banks. These developments are likely to result in tighter credit conditions and could weigh on economic activity.

The global economic outlook remains somewhat resilient despite the significant amount of tightening that has occurred so far. Inflation has remained sticky and although it may continue to decelerate in the coming months, it is likely to remain above-target and keep central banks vigilant. As a result, the bar remains quite high for central banks to cut interest rates in 2023 unless the growth profile deteriorates significantly. Many developed market yield curves have been substantially inverted for some time, another potential leading indicator of slowing economic growth. Given the likely prospects of slower economic growth going forward, the portfolio manager continues to remain defensive from a credit perspective, while tactically adding duration. By the end of the reporting period, the Underlying Fund held a somewhat higher cash position to take advantage of any weakness in credit markets going forward. Furthermore, the portfolio manager continues to focus on carry as it remains higher than what has been seen in recent years resulting in a more attractive yield profile for the Underlying Fund without taking excessive credit risk. Carry is the difference between the yield on a longer maturity bond and the cost of borrowing.

Related Party Transactions

AGFI is the manager ("Manager") of the Fund. Pursuant to the management agreement between the Fund and AGFI, AGFI is responsible for the day-to-day business of the Fund. AGFI also acts as the investment (portfolio) manager, managing the investment portfolio of the Fund. Under the management agreement, the Fund (except for Series I, Series O, Series Q and Series W Shares, if applicable) pays management fees, calculated based on the Net Asset Value of the respective series of the Fund. Management fees of approximately \$1,556,000 were incurred by the Fund during the six months ended March 31, 2023.

Certain operating expenses relating to registrar and transfer agency services are paid directly by AGFI and in exchange, a fixed rate administration fee is payable by the Mutual Fund Series, Series F, Series FV, Series I, Series T and Series V Shares, as applicable, of the Fund. The administration fee is calculated based on the Net Asset Value of the respective series of the Fund at a fixed annual rate, as disclosed in the current prospectus. Administration fees of approximately \$82,000 were incurred by the Fund during the six months ended March 31, 2023.

AGFI is an indirect wholly-owned subsidiary of AGF Management Limited.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" or negative versions thereof and similar expressions.

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2023

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

The forward-looking statements are by their nature based on numerous assumptions, which include, amongst other things, that (i) the Fund can attract and maintain investors and has sufficient capital under management to effect its investment strategies, (ii) the investment strategies will produce the results intended by the portfolio manager, and (iii) the markets will react and perform in a manner consistent with the investment strategies. Although the forward-looking statements contained herein are based upon what the portfolio manager believes to be reasonable assumptions, the portfolio manager cannot assure that actual results will be consistent with these forward-looking statements.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, taxation, changes in government regulations, unexpected judicial or regulatory proceedings, technological changes, cybersecurity, the possible effects of war or terrorist activities, outbreaks of disease or illness that affect local, national or international economies (such as COVID-19), natural disasters and disruptions to public infrastructure, such as transportation, communications, power or water supply or other catastrophic events.

It should be stressed that the above-mentioned list of factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Financial Highlights

AGF Total Return Bond Class

(CLASS OF AGF ALL WORLD TAX ADVANTAGE GROUP LIMITED)

MARCH 31, 2023

Explanatory Notes

(1) a) This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements. Under International Financial Reporting Standards ("IFRS"), investments that are traded in an active market are generally valued at closing price, which is determined to be within the bid-ask spread and most representative of fair value. As a result, there is no difference between the net assets per share presented in the financial statements ("Net Assets") and the net asset value per share calculated for fund pricing purposes ("Net Asset Value").

b) The following series of the Fund commenced operations on the following dates, which represents the date upon which securities of a series were first made available for purchase by investors.

Mutual Fund Shares	April 2016
Series F Shares	April 2016
Series FV Shares	November 2018
Series Q Shares	April 2016
Series V Shares	November 2018
Series W Shares	October 2016

(2) Net Assets, dividends and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.

(3) Dividends and distributions were paid in cash/reinvested in additional shares of the Fund, or both.

Series FV and Series V Shares of the Fund may make monthly distributions of capital so long as there is sufficient capital attributable to the series. The capital per share of the Series FV and Series V Shares as applicable, is as follows:

As at	Mar 31, 2023 (\$)	Sept 30, 2022 (\$)	Sept 30, 2021 (\$)	Sept 30, 2020 (\$)	Sept 30, 2019 (\$)	Sept 30, 2018 (\$)
Series FV Shares	9.07	9.42	9.95	10.16	10.68	-
Series V Shares	8.97	9.21	9.72	10.05	10.49	-

(4) This is not a reconciliation of the beginning and ending Net Assets per share.

(5) The management expense ratio ("MER") of a particular series is calculated in accordance with National Instrument 81-106, based on all the expenses of the Fund (including Harmonized Sales Tax, Goods and Services Tax, income tax and interest, but excluding foreign withholding taxes, commissions and other portfolio transaction costs) attributable to that series, expressed as an annualized percentage of average daily Net Asset Value of that series during the period. For new series launched, the MER is annualized from the date of the first external purchase.

As a result of the Fund's investment in the Underlying Fund, the MER is calculated based on the expenses of the Fund allocated to that series, including expenses indirectly

incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of that series of the Fund during the period.

The Fund does not pay duplicate management fees on the portion of the assets that it invests in the Underlying Fund. Accordingly, AGFI will waive the management fees payable or paid by the Underlying Fund in order to avoid such duplication.

(6) AGFI waived certain fees or absorbed certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of AGFI and AGFI can terminate the waiver or absorption at any time.

(7) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily Net Asset Value during the period.

As a result of the Fund's investment in the Underlying Fund, the TER is calculated based on commissions and other portfolio transaction costs of the Fund, including such costs that are indirectly incurred by the Fund attributable to its investment in the Underlying Fund, divided by the average daily Net Asset Value of the Fund during the period.

(8) The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio advisor manages its portfolio investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's PTR in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

PTR is calculated based on the lesser of the cumulative cost of purchases or cumulative proceeds of sales divided by the average market value of the portfolio, excluding short-term investments.

Management Fees

The Fund is managed by AGFI. As a result of providing investment and management services, AGFI receives a monthly management fee, based on the Net Asset Value of the respective series, calculated daily and payable monthly. Management fees in respect of Series I, Series O, Series Q and Series W Shares, if applicable, are arranged directly between the Manager and investors and are not expenses of the Fund. AGFI uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund's shares, investment advice, as well as for general administrative expenses such as overhead, salaries, rent, legal and accounting fees relating to AGFI's role as manager.

	As a percentage of management fees		
	Annual rates	Dealer compensation	General administration and investment advice
Mutual Fund Shares	1.45%	28.27%	71.73%
Series F Shares	0.75%	-	100.00%
Series FV Shares	0.75%	-	100.00%
Series V Shares	1.45%	23.20%	76.80%

Past Performance*

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

It is AGFI's policy to report rates of return for series in existence greater than one year. The performance start date for each series represents the date of the first purchase of such series, excluding seed money.

All rates of return are calculated based on the Net Asset Value.

Year-By-Year Returns

The following bar charts show the Fund's annual performance for each of the past 10 years to September 30, 2022 (interim performance for the six months ended March 31, 2023) as applicable, and illustrate how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

Mutual Fund Shares

Performance for 2016 represents returns for the period from April 28, 2016 to September 30, 2016.

Series F Shares

Performance for 2016 represents returns for the period from May 2, 2016 to September 30, 2016.

Series FV Shares

Performance for 2019 represents returns for the period from February 4, 2019 to September 30, 2019.

Series Q Shares

Performance for 2016 represents returns for the period from May 12, 2016 to September 30, 2016.

Series V Shares

Performance for 2019 represents returns for the period from December 28, 2018 to September 30, 2019.

* The indicated rates of return shown here are the historical returns including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or other optional charges by any securityholder that would have reduced returns or performance. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
