

Investment Philosophy

We believe that investing in the growth leaders of each market cycle offers investors the best opportunity to outperform over time. For this reason, we seek companies that reflect innovation and quality, while exhibiting a clearly defined strategy for achieving above average growth and the proven ability to implement and drive the strategy forward. Our approach leads to a concentrated, high conviction portfolio.

Investment Process Overview

Investment Process

We employ a bottom-up stock selection process based on in-depth fundamental research. Our process begins with a global investment universe of over 5,000 securities.

Idea generation may involve, but is not limited to, a quantitative screen. A good investment idea for the portfolio can also originate from management meetings (e.g. asking management teams who are their suppliers or competitors), attending industry conferences, or from sell-side generated research. A good idea, however, must screen well on our proprietary quantitative framework which prioritizes revenue growth, but also examines other growth metrics such as earnings growth, positive revisions, and rising cash flow. Growth measures are viewed from both an absolute and relative basis, as well as a historical perspective in conjunction with an examination of sustainability into the foreseeable future.

Research models and external databases are utilized to determine these characteristics for each company. The qualitative analysis continues to narrow the investable universe to 200+ companies through on-going, targeted research. This analysis identifies strong companies with leading product or service innovations, strong management and industry leaders in attractive markets. Company valuations are constantly monitored on both an absolute and relative basis compared to a peer group and the market, and valuation is also considered on a relative basis considering the long-term growth expectations. The rigorous bottom-up research process aims to ensure each candidate for inclusion exhibits strong fundamentals.

The catalyst identification process further reduces the universe to 100+ companies, singling out potential purchase candidates. Factors scrutinized at this stage include market share trends, research and development (R&D), free cash flow generation and profitability. These factors are included in evaluating a company's ability to grow at above average rates. Innovation and the allocation of spending to R&D are closely monitored, as is the productivity of this spending. Our resulting high-conviction portfolio consists of 20-40 companies that exhibit strong growth characteristics.

[^] AGF Global Select Strategy; ⁹Portfolio (net of max. institutional fee) * MSCI All Country World Index. ¹SPSD December 31, 2005

Performance and risk is based on AGF Global Select composite. Strategy characteristics are based on the AGF Global Select (fee paying) representative account. This information is additional to the GIPS-compliant presentation found at the end of the document. Past performance is not indicative of future results. [`]Earnings Growth values are using earnings before interest, taxes, depreciation and amortization (EBITDA). ² Does not include cash position of 4.41%. This report is not complete without disclaimer.

Source: AGF Investments, as at December 31, 2024.

Disclaimer

All information is in U.S. dollars. Strategy performance is based on the GIPS AGF Global Select Composite. The performance presented is gross and net of fees; rates of return for greater than one year have been annualized. AGF Investments uses Canadian dollar gross of fees returns and converts them on a monthly basis using spot rates sourced from Bloomberg. Net-of-fees returns are calculated by deducting the maximum institutional fee charged from the gross-of-fee return. Actual fees may vary depending upon the fee schedule and portfolio size. Past performance is not indicative of future results. The AGF Global Select Strategy portfolio characteristics in this presentation are based on a single (fee paying) representative account for the strategy within the composite.

The gross performance presented by AGFA is before deducting investment advisory fees but is net of transaction costs. Client returns will be reduced by advisory fees and other expenses. The client is referred to Part II of AGFA's Form ADV for a full disclosure of the fee schedule. As fees are deducted quarterly, the compounding effect will be to increase the impact of the fee by an amount directly related to the gross account performance. For example, on an account with a 0.5% fee, and gross performance of 20% over one year, the compounding effect of the fee will result in performance of approximately 19.4%. A \$10,000 initial investment would grow to approximately \$14,256 gross of fees, versus \$14,000 net of fees, over a two year period.

The value of investments and the income from them can fall as well as rise. Investments denominated in foreign currencies are subject to fluctuations in exchange rates, which may have an adverse effect on the value of the investments, sale proceeds, and on dividend or interest income. Investors may not necessarily recoup the full value of their original investment. Investors should be aware that forward looking statements and forecasts may not be realized.

Effective October 31, 2016, the calculation methodology for holdings-based portfolio characteristics with the exception of weighted average market cap and active share has changed to a weighted ranking methodology, considered by AGF Investments as a better reflection of the relevant attributes. The new methodology, applied prospectively, applies a ranking to each security, uses the percentage market value weight of the security in the portfolio/benchmark and determines a median of extracted securities to arrive at the portfolio/benchmark characteristic (by summing the weight of securities which have a rank to calculate a rank for the portfolio/benchmark and extracting securities with the same portfolio rank).

The AGF Global Select Strategy is available to institutional clients via various channels. Clients accessing the strategy through a Separately Managed Account (SMA) platform will experience performance results that differ from results produced by AGF Investments America Inc.'s discretionary management of the strategy based on a number of factors, including but not limited to fees charged, implementation of the strategy by the SMA provider and investment restrictions applicable to each client's account. AGF Investments America Inc. does not have investment authority over client accounts accessing the strategy through a SMA platform.

An Investment in the AGF Global Select Strategy is subject to risks including but not limited to: **Geopolitical Risks:** Changes in political leaders, and/or political instability, changes in government policies, and geopolitical tensions can significantly impact global investments and may create greater volatility. **Currency Risk:** Fluctuations in exchange rates can affect the value of international investments. **Regulatory Risk:** Different countries have varying regulations that can impact investments. Changes in laws and regulations, such as tax policies or trade restrictions, can affect the profitability of global investments. **Market Liquidity Risk:** Some global markets may be less liquid than others, making it difficult to buy or sell investments at desired prices. This can be particularly challenging during periods of market stress.

It should not be assumed that an investment in the strategy will be profitable or that the strategy will be able to meet its investment objective.

AGF Investments is a group of wholly owned subsidiaries of AGF Management Limited, a Canadian reporting issuer. The subsidiaries included in AGF Investments are AGF Investments Inc. (AGFI), AGF Investments America Inc. (AGFA), AGF Investments LLC (AGFUS) and AGF International Advisors Company Limited (AGFIA). The term AGF Investments may refer to one or more of these subsidiaries or to all of them jointly. This term is used for convenience and does not precisely describe any of the separate companies, each of which manages its own affairs.

AGF Investments entities only provide investment advisory services or offers investment funds in the jurisdiction where such firm and/or product is registered or authorized to provide such services.

AGF Investments America Inc. is a registered investment advisor with the U.S. Securities Exchange Commission and is wholly owned by AGF Management Limited, a Canadian reporting issuer. AGFA engages one or more affiliates and their personnel in the provision of services under written agreements (including dual employee) among AGFA and its affiliates and under which AGFA supervises the activities of affiliate personnel on behalf of its clients ("Affiliate Resource Arrangements").

Compliance Statement

AGF Investments claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. AGF Investments has been independently verified for the periods January 1, 2006 - December 31, 2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The AGF Global Select Composite has had a performance examination for the periods January 1, 2006 to December 31, 2023. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Firm Description

Founded in 1957, AGF Management Limited (AGF) is an independent and globally diverse asset management firm. Our companies deliver excellence in investing in the public and private markets through three business lines: AGF Investments, AGF Capital Partners and AGF Private Wealth.

AGF brings a disciplined approach, focused on incorporating sound, responsible and sustainable corporate practices. The firm's collective investment expertise, driven by its fundamental, quantitative and private investing capabilities, extends globally to a wide range of clients, from financial advisors and their clients to high-net worth and institutional investors including pension plans, corporate plans, sovereign wealth funds, endowments and foundations.

Headquartered in Toronto, Canada, AGF has investment operations and client servicing teams on the ground in North America and Europe. AGF serves more than 800,000 investors. AGF trades on the Toronto Stock Exchange under the symbol AGF.B.

*AGF Investments represents AGF's group of companies who manage and advise on a variety of investment solutions managed by its fundamental and quantitative investing teams. AGF Investments Inc. is a wholly-owned subsidiary of AGF Management Limited and conducts the management and advisory of mutual funds in Canada.

Benchmark Description

The benchmark is the MSCI All Country World Index. The MSCI All Country World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

Composite Description

The Global Select Composite includes all portfolios invested primarily in shares of companies around the world with superior growth potential.

Composite Creation Date and Inception Date

The composite was created in January 2011. The composite's inception was in December 2005.

Currency

Valuations and returns are computed and stated in U.S. Dollars.

Minimum Portfolio Size

There is no minimum portfolio size required for inclusion into the composite.

Calculation Methodology

Results reflect the reinvestment of dividends, income and other earnings.

Gross-of-fees returns are presented before management expenses and custodial fees, but after all trading expenses and withholding taxes.

Net of fees returns are calculated by deducting the maximum institutional fee charged from the gross of fee return.

Composite returns are calculated using asset-weighted returns by weighing the individual account returns using beginning-of-period values.

Internal Dispersion Measure

Internal dispersion is calculated using the asset-weighted standard deviation of all accounts included in the composite for the entire year; it is not presented for periods less than one year or when there were five or fewer portfolios in the composite for the entire year as this is not considered meaningful.

Three-Year Annualized Ex-Post Standard Deviation

The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is presented once the composite has three full calendar years of performance. Gross returns are used to calculate risk measures.

Fee Schedule

The maximum management fee for the strategy is 0.70% per annum.

Additional Information

The portfolios in this composite are valued at both fair value and systematic adjusted fair value.

Policies for fair value and systematic adjusted fair value portfolios, calculating performance, preparing compliant presentations, and a complete list and description of firm composites are available upon request at GIPS@AGF.com.

Past performance does not guarantee future results.
